Management

ALESSANDRO BELLONI

Chairman and Executive Director in charge of administration, finance, budgeting and control. Also coordinates the IT and HR functions. He is also Chairman and co-founder of FSI. His concern for environmental sustainability and his quest for ecologically sustainable services and solutions led him in 2013 to help set up the R&D company ECO2ZONE, where he is Chairman and Managing Director. To offer customers a complete range of services he then helped to set up FERVO, a network combining the services offered by FSI, ECO2ZONE, VME and RECLEAN.

ROCCO RUGGIERO

Executive Director in charge of the Building Division. His understanding of environmental protection issues and their implications for property management, combined with his thorough knowledge of the technical installations industry, have made him one of VME's foremost strategists since 2014. Managing Director of FSI (of which he is co-founder) and ECO2ZONE. His deep knowledge of the technical and engineering sector makes him responsible for the "Building" Line. He is one of the main promoters of FERVO.

ULDERICO MONETTI

Executive director in charge of the Landscape Division. He began his working life as a gardener, and has worked in gardening services ever since. Never one to decline a challenge, he set up his own company in 2004 and managed to get it firmly established. More recently his perspicacity and dynamism, coupled with a powerful environmental awareness and appreciation of the need for sustainability, made him look for new solutions that could be applied to landscape management using R&D applied to the creation of new products and services.

LANDSCAPING
AND CIVIL WORKS

www.vme.company

About us

VME was founded in 2004 to offer its customers services and solutions in two areas of intervention: construction and maintenance of parks and gardens and building works of interior and exterior renovations, with complete or partial remaking of portions of buildings.

What we do

VME offers private and public customers innovative and ecologically sustainable environmental solutions for the creation or improvement of parks and gardens, thanks to a careful selection of plant species and materials. The high standards of its proposed interventions and the professionalism of its landscape gardeners and engineers can be relied on to enhance any urban setting and, in the case of buildings, make them better to live in and worth more.

How we operate

For its landscaping services VME deploys highly professional specialists such as landscape gardeners, field technicians and experts in landscape engineering. Their contributions to landscape design and management ensures that the solutions proposed will be of high quality, simplifying care, conservation and maintenance. In construction, too, VME puts its experience and professionalism at the service of its customers.

Services

LANDSCAPE MANAGEMENT

Design, construction and maintenance of public and private parks and gardens. The experience and professionalism, combined with the use of cutting-edge techniques, products and equipment, guarantee excellent standards of service.

► Design

With the collaboration of specialized architects and qualified professional figures, designs spaces and gardens, evaluating the territorial context and following the customer's preferences.

► Flowerbeds, hedges and terraces

We design gardens, interiors and terraces for every taste, from classical to modern to Japanese, to achieve a satisfying result of very high quality.

► Turf lawns

Installation of turf mats with advantages compared to traditional sowing. In fact, the turf lawn does not require constant care and the final effect is immediate.

► Seeded lawn

Restructuring of lawns through the use of seed lawns made with the use of the most valuable and suitable seeds.

► Irrigation systems

Realization and maintenance of automated irrigation systems for residential areas (individual or shared), sports facilities, industrial areas, public parks and gardens, terraces, etc.

► Tree pruning and felling

We provide a professional service using tree-climbing techniques, cherry-pickers, cranes or other devices to reach awkward positions.

CONSTRUCTION

Interior and exterior renovation, design and construction supervision, urban infrastructure, creation of fountains and pools.

► Design, planning and supervision of building works

Management of the entire order: from inspections to suppliers' offers to be submitted to the client for approval; execution of works in accordance with the requirements of the approved project.

► Renovations

Restructuring of interiors and exteriors, adaptation, arrangement, renovation of houses, historic villas and private homes.

► Urban infrastructure

Works in outdoor and urban furniture, such as roundabouts, low walls, sidewalks and pedestrian paths.

► Pools, fountains and ponds

Design and construction of underground or above ground pools, fountains and ponds.

FACILITY MANAGEMENT

An integrated approach that makes the customer organization more effective by designing, planning and providing environmental services enabling it to adapt easily and quickly to market changes, make the most of its property and enhance its workplaces.

FACILITY MANAGEMENT NETWORK

The Fervo network

FERVO is a network of firms offering customers a wide range of services for Facility Management, Design and Technical Services, Landscape and Energy, Reception and Cleaning, Landscaping and Civil Works.

FERVO results from the networking abilities of some highly specialized companies offering complementary services; it makes it easier to combine those services by enabling customized offerings to be planned.

FERVO combines resources, people and knowledge to optimize the response to customer needs.

FERVO makes the activities of individual companies more precise and effective, and makes it easier to achieve set goals.
